Course Outline

Introduction to MySQL

- What is a Database and Why Do We Need SQL?
- Top 5 Problems in Excel and Why Using SQL Solves This Problem
- Should We Import from Excel and Why? How It is Done?
- Create a Link to Excel Spreadsheet with MySQL?

Tables and Queries

How to Create Tables 101

- SQL Data Types
- Primary Keys
- Null values and Not Null Values
- Auto Increment

How to Create a Basic Query

- Use the Where clause
- Conditional statements
- Multiple conditions
- Comparison Operators
- Logic Values
- Null Values
- Patterns also known as Wildcard characters
- Compare Column Values

Advanced Queries

- Distinct Values

- Top Values
- Date Functions
- Date Calculations
- Aggregate Functions
- String Functions
- Sort Data
- Rank Data

Save a Query

Execute a Query

Modify a Saved Query

Data Wrangling

Group Data

Filtering Grouped Data

Summarize Group Data

Pivot and Unpivot Operators

Data Analytics

Joins

- Inner Join
- Left Join
- Full Outer Join
- Self-Join
- Unions
- Except and Intersect

Presenting and Making Sense of Query Results

Saving the Query Results and Exporting

Generating Reports

Tables and Queries

Importing and Exporting Data

Update Data

Queries

- Distinct Values
- Top Values
- Subqueries with “In”
- Inline Views

Views

Create a Simple View

With Check Option

Locks and Transactions

- Exclusive Table Locks
- Shared Table Locks
- Using Variables
- Setting Variables with Selects
- Select/Update Example
- Simple Transactions

MySQL Functions

- String to Date and Date Format
- Control Flow Functions
- Casting Functions

Stored Procedures

- Introduction to Stored Procedures
- Changing the Delimiter
- Editing a Stored Procedure
- Variable Scope
- A Data Generating Procedure

Triggers

- Introduction to Triggers
- Validating Triggers
- Triggers and Transactions

User Defined Functions

- Functions Vs. Procedures
- User-Defined Functions
