

Intro to Project Management

The course begins with an introduction to project management as a science. Students will obtain a firm grasp of different methods and strategies used in the field of project management. Moving deeper into project management theory, students will explore a Planning phase, where a large degree of project success is determined. The last part of the course is a facilitated discussion on project managers and what it takes to become a successful one.

Group classes in NYC and on-site training is available for this course.
