

Introduction to R for Statistical Analysis

The aim of this course is to provide an introduction to R, the environment for statistical computing and graphics. Statistical analysis will be performed through the graphic user interface called RCommander. The focus of the course will be on getting familiar with the R environment, to use R for manipulation and exploration of data, and to perform simple statistical analyses.

Course Outline

Introduction into R language

Data structures

Data manipulation

Graphics

Basic statistics and simulations

Linear models, miscellaneous
