---

### **Form Basics and Security**

- Post vs. Get
- Radios, Checkboxes, and Select Fields
- Magic Quotes
- Securing the page
- Using Functions

### **Sending Email**

- Setting Up MAMP Pro
- Setting Up XAMPP and Mercury Mail
- Sending a Test Email

### **Simple Form Validation and Email**

- Sanitizing Input
- Error Checking
- Displaying Errors
- Sending Email
- Adding a Thank You Page
- Including Files

## **Section 4**

---

### **Cookies**

- Adding Cookies
- Tracking the Number of Visits
- Sending an Email with the Cookie Info

### **Sessions**

- Starting a Session
- Using Session Variables
- Log In/Log Out
- Destroying Session Variables

## File Uploads

- Making a File Upload Form
- The \$\_FILES Array
- Uploading Files
- Basic Security

## Section 5

---

### Creating a Database/MySQL/SELECT

- Creating a New Database
- Connecting to the Database
- SQL Basics
- The SELECT Statement
- Display the Number of Rows Returned
- Making a Reusable Connection Script
- MySQL vs. MySQLi vs. PDO

### Making a Reusable Connection Script

- Error Checking
- Making an Include
- Sorting Results

### Prepared Statements

- Selecting and Filtering Results
- Preventing SQL Injection Attacks with Prepared Statements

## Section 6

---

### SQL: Insert

- The INSERT Statement
- Using phpMyAdmin
- Inserting Information from a Form

### SQL: Update

- The UPDATE Statement
- Update Form
- Display Data in the Update Form
- Display Checkboxes
- Hidden Fields

### SQL: Delete

- The DELETE Statement
- Deleting Rows from a Database
- Passing ID Variables in a URL

### SQL: Search

- Wildcard Searches
- Searching with a Form
